

New and Reground Corrugating Rolls

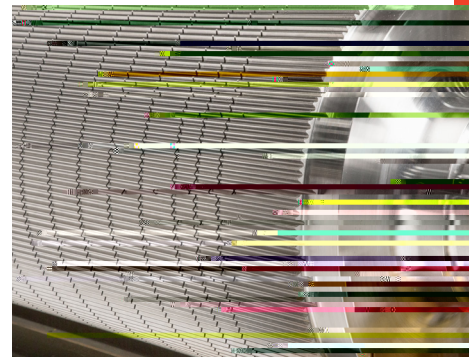

Upgrade

Description

BW Papersystems supplies new corrugating rolls for any singlefacers. Existing rolls can also be reground. The rolls are profile ground to extreme accuracy on world class machines located in Phillips, WI.

Application

- New rolls are available for any brand or model Singlefacers
 - United
 - Koppers
 - Langston
 - Fosber
 - Bobst/Asitrade
 - MHI
 - BHS

Benefits

- Precision regrinds minimize diameter reduction, extending roll life by allowing additional regrinds
- Paper saving low take-up profiles are available, including custom flute profiles (YouFlute) to optimize board properties and minimize paper consumption
- ASME certification and engineered procedures for leak, journal, and flute repairs
- New or rebuilt carts and modules are available
- Module exchange programs deliver savings on installation cost and time
- Industry leading delivery available
- Engineered Gundrilled roll solutions
- Installation packages with pressure roll and glue rolls

Coating Options:

- Duroclad is the industry leading coating, with multiple examples recorded in excess of 1 Billion lineal feet of production
